

# Special Education Teacher

Special education teachers oversee the education and training of students with physical, emotional, mental, and learning disabilities.

Over the past few years I have experienced helping and working with special education friends in my classes.

It makes me happy to see them enjoying and participating in our class activities.

I feel like I connect with my special education friends easier than others.

I would like to teach kids in every subject to help them succeed.

To prepare for this career, I am continuing to help with special education classmates. I hope to volunteer at a special education facility to continue preparing for my career as a Special Education Teacher. I want to attend Welch College or Austin Peay University to earn a degree in Special Education.
