

Hartley's Purr-fect Pets Project

4th Grade - Joelton Elementary

Pet Name

Breed

Age

Tricks

My Responsibilities

Sadie

American
Miniture Horse

19 years

She sort of knows
how to be ridden

She needs hay in the morning. You have to fill up her bucket with fresh water. In the afternoon I let her out in the pasture, and at night she needs to be brought in and fed her vitamins.

Baylee

American
Miniture Horse

18 years

None

The responsibilities for her are the same things I do for her sister Sadie.

Zoey

Domestic Short
Hair

6 years

None

In the morning I fill her bowl 1/3 of the way up and freshen her water bowl. In the afternoon, I cover just the bottom of her bowl for a little snack. We have to watch how much she eats because she is on a diet. Also, you have to clean her litter box every afternoon and change out the litter every weekend.

Maximo

Boston Terrier/
Chihuahua mix

5 years

Sit, shake, sit-up, lay
down, find, roll over,
leave it, and come

First thing in the morning, we let him outside to go potty. Then I feed him one scoop of dog food. (We have to use a special bowl so he doesn't eat too fast and get an upset stomach.) Whenever he scratches on the door we let him outside. At night, I feed him one more scoop of dog food and let him outside again before he goes to bed. He also needs exercise, so it is good to run with him, let him play with his toys, and with his best friend Vivi.

Sammy

Goldfish

3 years

Play dead and swim
upside down (but not
on command)

I feed him a small pinch of fish food in the morning and again at night. Every so often, I clean his tank.

Vivianna

Portuguese
Podengo

2 years

Sit, shake, lay down,
standup, come and
almost rollover.

The responsibilities for her are the same things I do for her best friend Max.
